TRICYCLE FRANCHISING AND REGULATORY OFFICE

TFRO Integrated Management Information System

System Workflow and User Guide

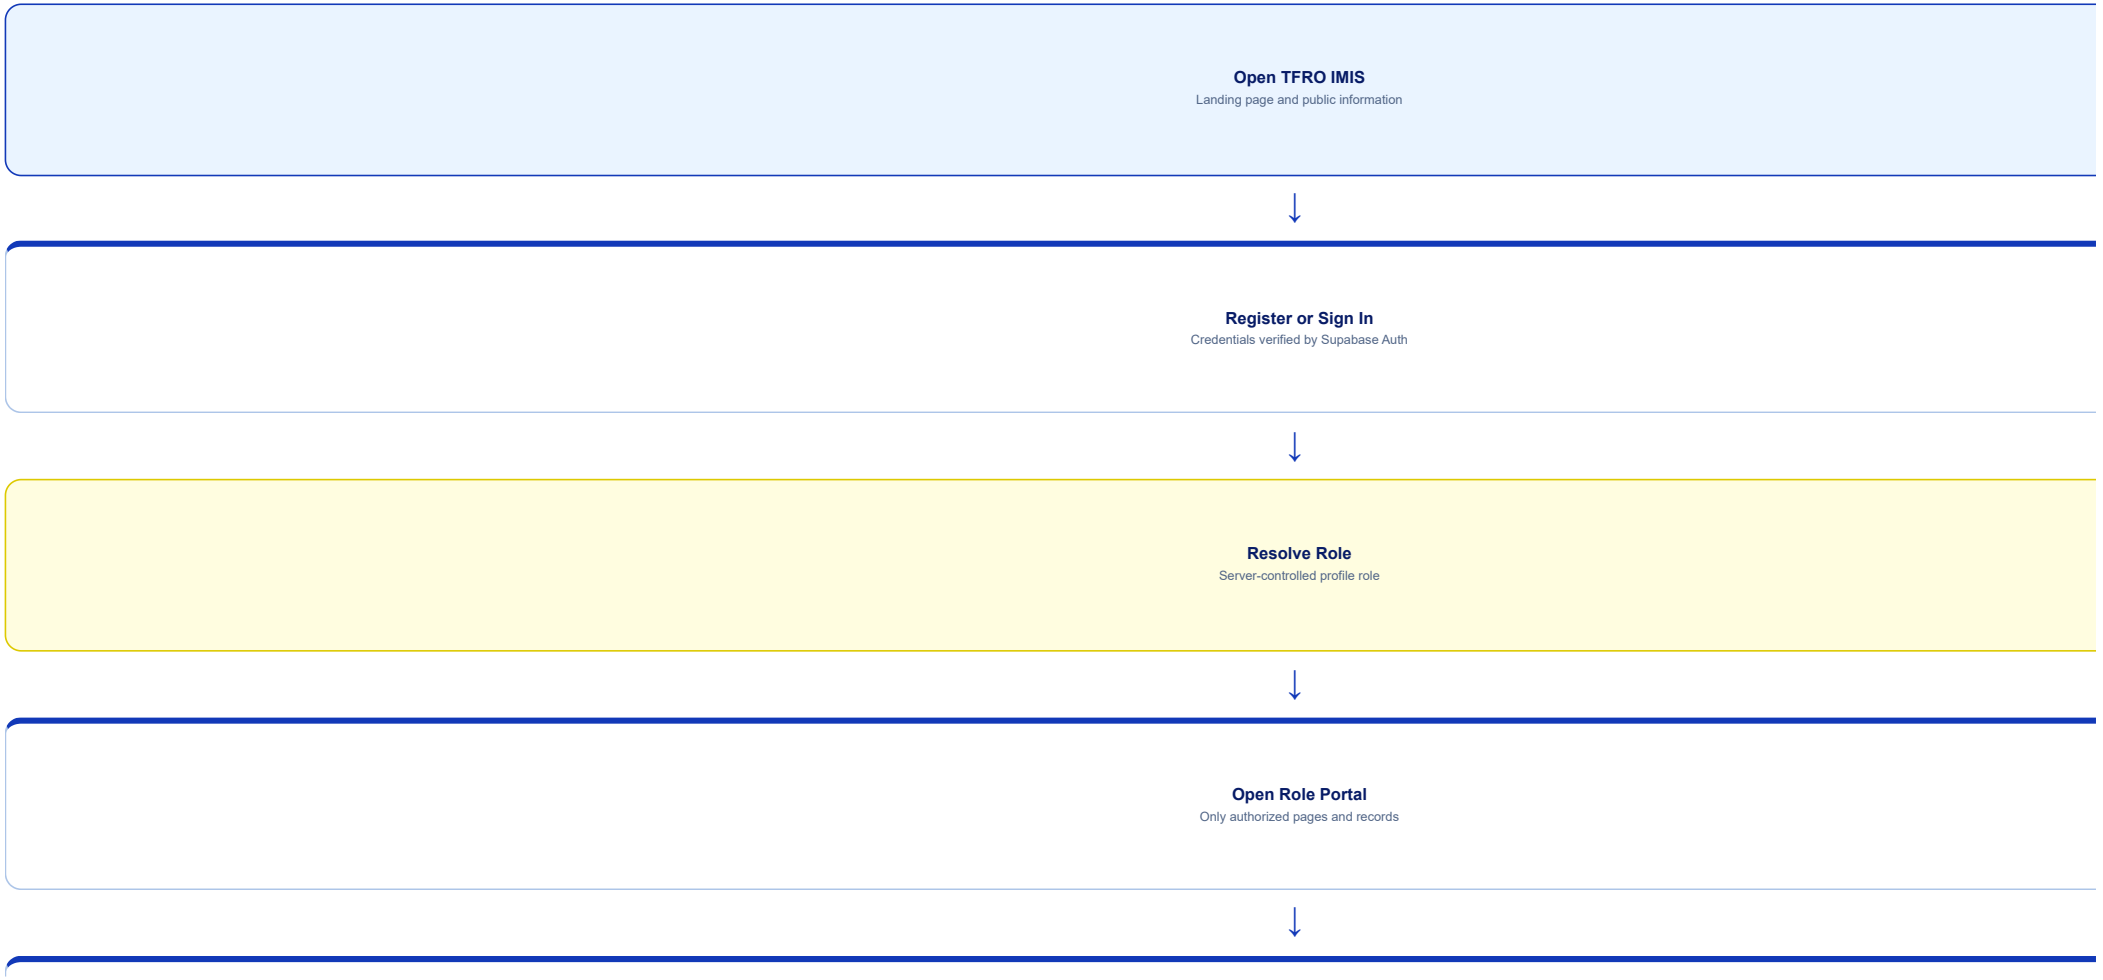

A printable overview of how users enter the system, how records move between roles, and how franchise, renewal, change-motor, violation, payment, and administrative processes are completed.

City Government of Lucena · Production workflow reference · Revision 27 October 2026 · Version 2.0

WHOLE-SYSTEM OVERVIEW

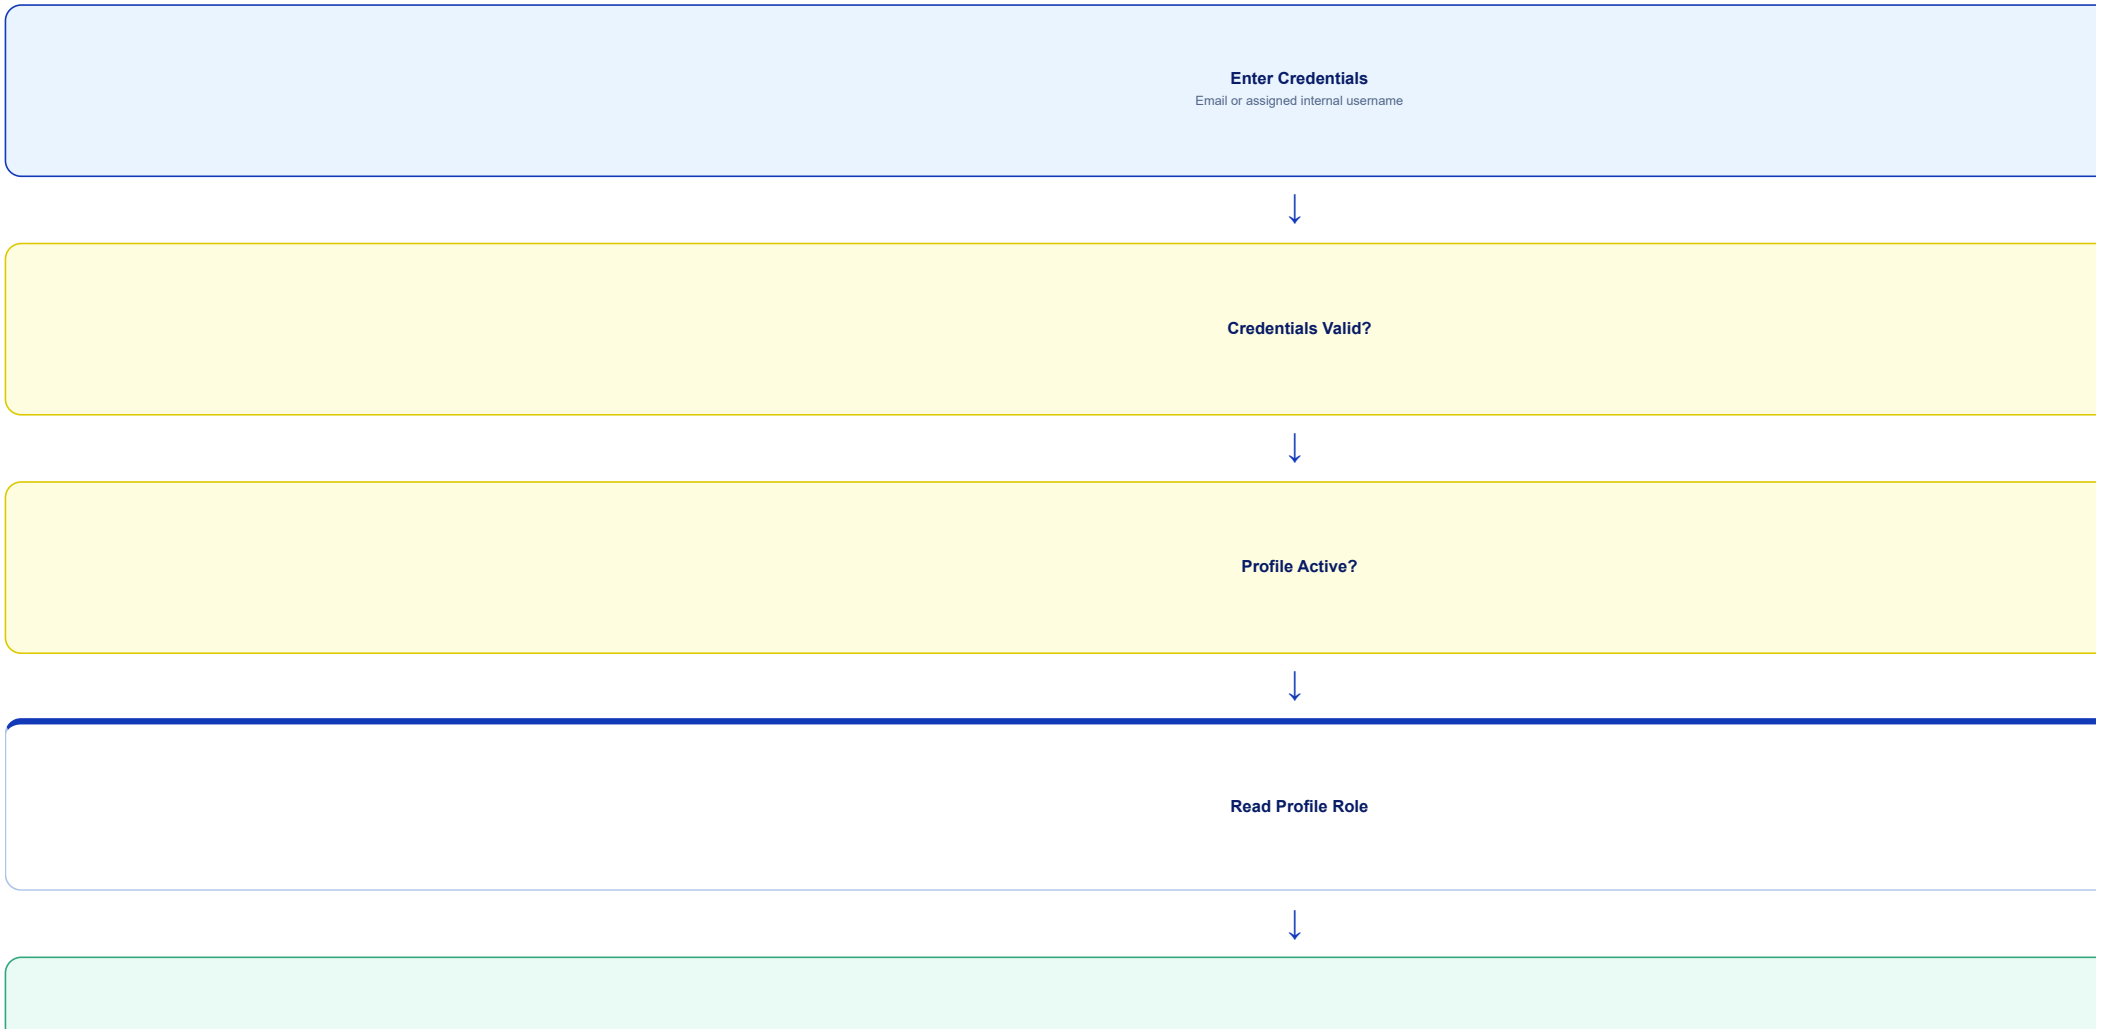

1. From Access to Completed Service

Every transaction begins with authenticated access. The database profile determines the portal and permissions; records then move through submission, review, decision, notification, and audit.

ACCESS CONTROL

2. Login, Registration, and Role Routing

CORE REGULATORY SERVICE

3. New Franchise Application Workflow

Operator

Open Apply for Franchise → Complete details → Upload six required PDFs → Submit

System

Validate fields/files → Create pending_review application → Store documents securely

Administrator

Open application → Verify each document → Complete and valid?

Decision

Approve → Create franchise + tricycle records → Notify operator

APPROVED

The application is linked to a new franchise record, the tricycle record is created, and administrator/date information is stored.

REJECTED / NEEDS CORRECTION

The reviewer records a reason. The operator is notified and can correct the requirements according to the displayed status.

Required evidence

Voter's certificate, barangay clearance, cedula, OHCR, insurance, and PMBL certification.

CONTINUING AUTHORITY

4. Franchise Renewal Workflow

Eligible Franchise

Operator may apply up to three months before expiration

↓

Complete Renewal

Form answers and eight requirements

↓

Submit for Review

↓

Admin Verification

Documents, inspection, and assessment

↓

VEHICLE RECORD CHANGE

5. Change Motor / MTOP Workflow

Operator

Choose linked franchise → Enter new motor details → Attach pictures/PDF evidence → Submit request

System

Save pending request → Keep current vehicle unchanged → Expose to Admin review

Administrator

Encode for assisted operator or open online request → Compare old/new details and evidence → Approve or reject?

System result

Preserve old details in history → Update franchise/tricycle → Notify operator

APPROVE

Engine, chassis, plate, make/model, and related fields are updated. Previous values are copied to change-motor history before replacement.

REJECT

The current franchise and tricycle details remain unchanged. A rejection reason is stored and sent to the operator.

Manual assistance

Admin or Head Admin may select an existing franchise and encode a Staff Manual Change Motor request. The system records its source, encoder, request date, changed identifiers, status, and notes.

ENFORCEMENT TO SETTLEMENT

6. Violation, Payment, and Vehicle Release

OPERATIONS AND GOVERNANCE

7. Administration, Notifications, Reports, and Audit

FIRST-TIME USE

8. Account Setup and First Login

Use the route that matches the person's real role. Do not create a substitute role simply to give access; every page and database action is role-controlled.

User	How the account is created	Information to prepare
Operator	Open **Register**, select Operator, accept the Terms and Privacy Notice, submit, then confirm the email address. The system matches both normalized full name and franchise number before linking an existing record; unmatched accounts are held for staff verification.	First/last name, email, contact number, address, franchise number picture.
Traffic Enforcer	An Administrator first adds the officer to the active Enforcer roster. The officer registers using the same Enforcer ID and confirms the email.	Name, email, contact number, active Enforcer ID, password, and p
Restricted Admin / TFRO Staff	Head Admin opens **Admin Users**, chooses the role, assigns credentials, and gives them securely to the employee.	Employee identity, authorized role, unique username, and tempora
Driver	No account is created. An Operator submits the driver record; an Administrator verifies it.	Driver identity, licence information, contact/address details, and 2×

Manual service for senior operators: Authorized administrators may select an existing franchise and encode a complete manual renewal or Change Motor request on the operator's behalf. Manual renewal captures operator, driver, vehicle, registration, verification, inspection, assessment, payment, MTOP, hardcopy, and staff-note required confirmation is complete. The request is marked **Staff Manual**, records the encoder and approval, and does not create a duplicate franchise.

1. **Open the correct registration or login page**
   Use personal credentials only. Internal usernames are issued by the Head Admin.
2. **Complete required identity fields**
   Names, IDs, franchise references, and contact information must match official records.
3. **Confirm email when required**
   Public Operator and Enforcer accounts may not sign in until email confirmation succeeds.
4. **Check your landing page and role**
   If the wrong portal opens or access is denied, stop and contact the Head Admin; do not register a second account.

Forgotten password

Use the supported password-recovery option or ask the Head Admin to perform an authorized reset. Never share passwords in chat or public notes.

Enforcer registration fails

Ask an Administrator to check that the Enforcer ID exists, is active, and exactly matches the value entered.

After every session

Confirm the saved status, close sensitive previews, sign out, and do not leave the workstation unattended.

OPERATOR PROCEDURE

9. How an Operator Uses the System

1. **Review the Operator Portal**
   Check franchise status, pending services, driver submissions, violations, notifications, and available forms.

2. **Apply for a new franchise, if none is approved**
   Enter franchise/previous registration, operator and address details, registration date, engine, chassis, plate, contact, and route.

3. **Upload all six application PDFs**
   Voter's certificate, barangay clearance, cedula, OHCR, insurance, and PMBL certification; each file must be PDF and no more than 5 MB.

4. **Track the application**
   pending_review
   means wait for Admin review. If returned, read the reason, correct the record/documents, and resubmit as allowed.

5. **Add a driver after franchise setup**
   Open Add Driver, complete licence and identity details, upload the required 2×2 JPG/PNG (maximum 5 MB), and submit. Duplicate licence numbers are not allowed.

6. **Wait for driver verification**
   The Administrator reviews and assigns the driver to the Operator/franchise. Pending submissions may be edited or deleted by the Operator.

7. **Use renewal or change-motor when applicable**
   Select only a franchise linked to your account. Renewal may be filed up to three months before expiration, and Change Motor may be requested while the franchise is still active. Submit through the dedicated workflow so previous values and review history are preserved.

8. **Respond to violations and messages**
   Review the violation, pay through the authorized office procedure, upload the Treasurer receipt once when offered, and wait for TFRO Staff verification.

Franchise approval result: the system creates the franchise and tricycle records only after Administrator approval. A submitted application by itself is not an active franchise.

Operator sees	Meaning	What to do
Pending / Pending review	The submission is saved and awaiting office action.	Do not submit a duplicate; monitor Notifications.
Needs correction / Rejected	The reviewer found missing, incorrect, or unacceptable information.	Read the remarks, correct only the identified submission, then resubmit if enabled.
Approved / Verified	The authorized review has been completed.	Confirm updated details and download/print only the forms made available.
Paid / Released	Staff recorded settlement and, where applicable, release information.	Keep the official receipt and generated form for reference.

DETAILED SERVICE RULES

10. Renewal and Change-Motor Checklists

Franchise Renewal

Select Franchise

↓

Choose Renewal Type

OFFICE PROCEDURE

11. How Enforcers, Staff, and Administrators Use It

Role	Start here	Normal operating sequence	Must not do
Traffic Enforcer	Ticketing & Driver Search	Search/scan driver → confirm the displayed driver/unit → select official violation(s) → complete ticket details → attach ticket photo → submit → confirm it appears in activity.	Do not record payment, approve records, or use ar
TFRO Staff	Violations	Find/encode the case → issue or print notice as needed → open Payments → inspect receipt → enter official receipt, amount, date, and release details → save → confirm Paid/Released status and print outputs.	Do not mark a case paid before receipt verification
Restricted Admin	Dashboard	Review pending totals → open Applications/Renewals/Motor Requests/Drivers → compare record and evidence → verify each requirement → approve, reject, or request correction → confirm notification and audit entry.	Cannot manage accounts/settings or perform Hea
Head Admin	Dashboard	Perform all Admin reviews → manage Admin/Staff accounts → maintain Enforcer roster → inspect reports/audit → open Profile › Account Credentials and select a user to review attributable actions.	Do not share the Head Admin account or delete ac

QUICK REFERENCE

12. Where to Go in the System

Administrator Pages

- **Dashboard:** operational overview and pending totals
- **Applications:** review new franchise applications
- **Franchise / Operators / Drivers:** master records and assignments
- **Renewals / Motor Requests:** assess and decide requests
- **Violations / Payments:** monitoring and authorized operations
- **Reports / Audit Log:** oversight, export, and complete traceability
- **Profile → Account Credentials:** click an account to inspect its action history
- **Admin Users:** create/delete restricted Admin and TFRO Staff accounts

Operator Pages

- **Operator Portal:** franchise summary and service status
- **Apply for Franchise:** new application and document upload
- **Driver Submission:** add/update pending driver information
- **Renewal:** submit requirements and track review
- **Change Motor:** request replacement of vehicle details
- **Notifications / Profile:** messages and account information

TFRO Staff Pages

- **Violations:** encode and monitor cases
- **Payments:** verify receipt, record settlement, release unit
- **Profile:** personal account details and password
- Other pages appear only when the role is authorized by system policy.

Traffic Enforcer Pages

- **Enforcer Portal:** field ticket activity
- **Driver Verification:** scan QR or enter verification token
- **Violation Submission:** ticket data and supporting photo
- **Profile:** personal account details

Status meanings

Pending: waiting for action. **Reviewing:** assessment underway. **Approved/Paid:** required decision completed. **Rejected/Correction:** user action is required.

If something fails

PRODUCTION HANDOFF

13. Deployment, Daily Operation, and Support

The production system is delivered as a browser-based service. GitHub Pages hosts the approved frontend, while Supabase provides authentication, database records, file storage, and access controls.
